Dell and EasiShare: Secure, On-Premise Enterprise File Sync-and-Share Solution

EasiShare empowers corporate users to send and request large files, backup desktop files, and sync-and-share content across devices without compromising data control and security.

- Security

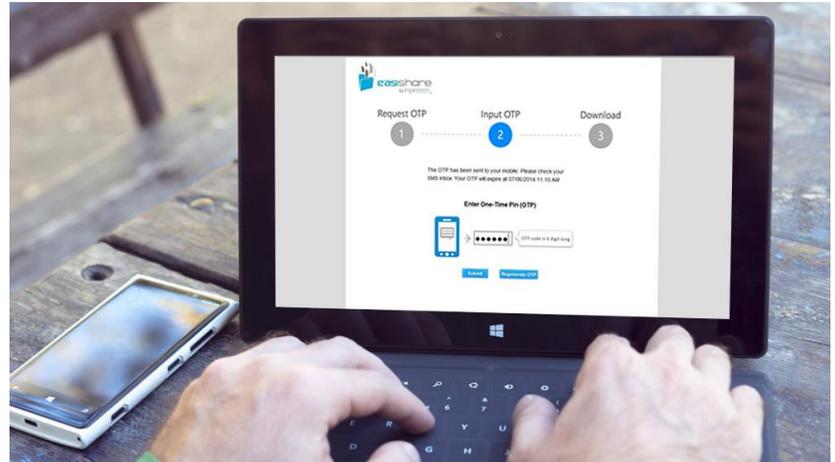

Ensure that your valuable files are protected with enhanced levels of security, such as AES 256-bit encryption, 2FA, Document Link Expiry, and Revoke Share.

- Mobility

Access, create, and share corporate files anywhere, on any mobile device, with EasiShare native mobile apps for iOS, Android and Windows Phone.

- Control –

With a centralized admin console to manage a large number of corporate users, know who content is going to, and when, and where.

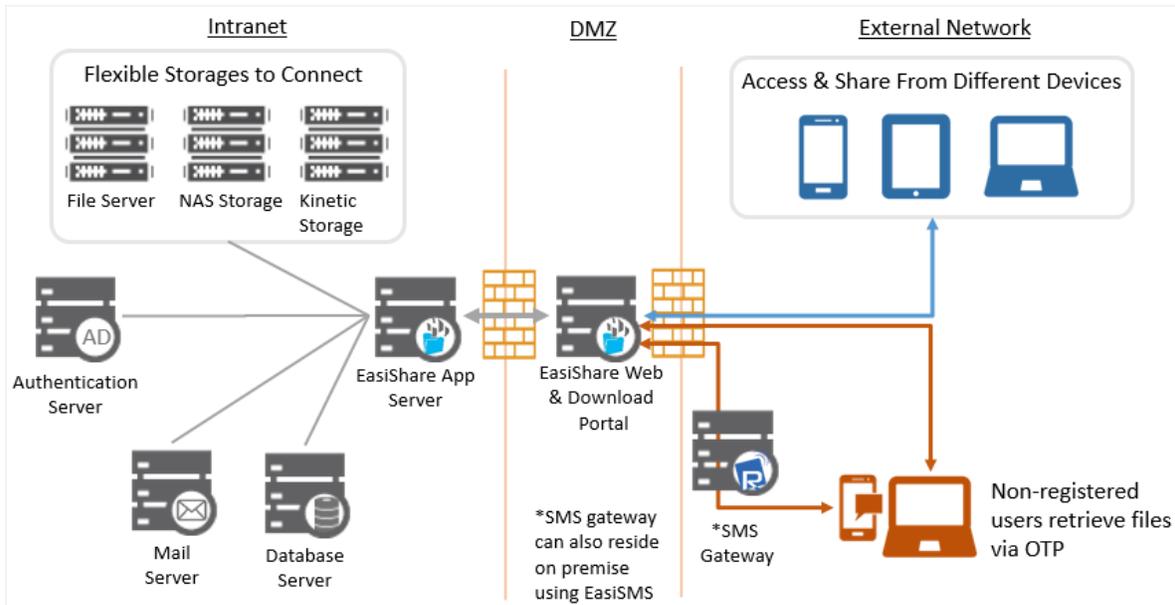

Many organizations require users to collaborate and send large documents to external parties. Consequently, users need to access files on different mobile devices, tablets, and PCs. But accessing files on mobile devices and sharing them with external parties presents serious security risks for companies.

EasiShare Overview

EasiShare secures document access using any device, any place, anytime, both online and offline. This allows companies to take advantage of the many benefits of using a mobile and outsourced workforce, without any of the risks. Corporate users can send or request large files of up to 50GB with enterprise-grade security. EasiShare also features seamless collaboration with Outlook, Mobile integration, and intelligent synchronization of files.

“EasiShare has demonstrated its capability to secure data on-the-go, and at the same time, ensure the information reach the right recipient through its 2FA feature. It is the ideal solution for collaboration and information dissemination for important stakeholders’ meetings, such as Board meetings.”

**– Jeffrey Hong, Head of Centre for User Support
National Institute of Education, Singapore (NIE)**

On-Premise Deployment

EasiShare can be 100% deployed in an organisation’s internal environment, on physical servers or VMs. EasiShare integrates with the organization's corporate Active Directory for authentication, as well as storages that are located on-premise, be it Windows File Server or SharePoint.

About Inspire-Tech

Inspire-Tech is passionate about creating secure and mobile enterprise file-sharing and messaging solutions for enterprises. Founded in 2000, the company has re-invented communication services with [RapidSMS](#) SMS gateway service, provided modular-based [EasiSMS](#) for SMS management, and established [RapidRecall](#), a pioneering cloud-based emergency notification system. [EasiShare](#), a secure mobile file sync-and-share solution, is the latest addition to the enterprise mobility suite.

Inspire-Tech fosters strong partnerships with leading technology companies, mobile carriers and local distributors. With more than 20,000 global users, Inspire-Tech's product reach is still growing!

The Dell Technology Partner Program

Inspire-Tech is a Dell Technology Partner, and EasiShare is certified by Dell to run on the Dell platforms specified in the technical architecture section.

The [Dell Technology Partner Program](#) is a multi-tier program that includes ISVs, IHVs, and Solution Providers. This global program helps partners build innovative and competitive business solutions using Dell platforms. Program resources keep customer costs low and help to sustain competitiveness.

The program has a structured and streamlined process that combines technology and business strategies with Dell Solution Center expertise to onboard and test partner products on Dell platforms. This testing process helps ensure that products have met the technical requirements to perform well on Dell platforms.
